Range for Play & Roster Eligibility

Revised 9/18/24

- Range for play is noted in parentheses next to the division name. Roster eligibility is broader than the range of play, making it possible to have a wider range of players on the roster.
- When determining partners, the pairings need to be no lower than 0.5 below the lowest range and no higher than 2.0 above the highest range, and no higher than 0.5 above the highest range for A divisions.
- To have a manageable roster, for any rostered player who is above or below range, have at least 2 players on roster who are in range.
